- **Youtube Thumbnail Designer** *May 2025*
  Designed engaging youtube thumbnails using Adobe Photoshop, focusing on visual hierarchy, typography, composition and audience appeal.

Projects

Smart Farm Dashboard | HTML, CSS, JavaScript, TailwindCSS

- Developed a web application for managing farm crops, including crop type, planting date, field location, and growth stage.
- Implemented crop growth tracking and automated watering and fertilizer reminders based on user-defined schedules.
- Designed a responsive dashboard to display crop information, growth progress, and upcoming farming tasks.

Bhojan (Food Ordering Web Application) | HTML, CSS, JavaScript, React.js

- Developed a responsive food ordering web application with dedicated pages for browsing food items, managing the cart, and placing orders.
- Implemented React Router for seamless navigation between the home, cart, and order placement pages, with reusable components for the navbar, footer, and login popup.
- Built interactive user authentication and cart functionality using React state management to provide a smooth and user-friendly ordering experience.

Multiplayer Battleship Game | CSS, C#, Blazor Server, Unit Testing, OOP

- Developed a multiplayer Battleship game using C# and Blazor server.
- Designed and styled responsive, interactive game interfaces using CSS, including grid layouts, ship placement visuals, and game state indicator.
